

WORLD-CLASS EDUCATION

The range of new methods and techniques in medicine continues to grow. Through science and operational-based educational training for veterinaries, laser treatments can be easily applied to the practice.

By developing advanced laser equipment with the unique "Made in Italy" quality, Medency is involved in several medical fields promoting the use and benefits of laser applications.

We believe in building solid and trustable relationships with our partners and direct customers providing training and service to increase the value of their practice.

DYNAMO

Compact Laser Technology for Veterinary Medicine

PORTABLE DESIGN WITH UNLIMITED POSSIBILITIES

Photobiomodulation (PBM) is a drug-free and non-invasive procedure that uses laser light to modulate biological processes and generates the best therapeutic outcomes.

Dynamo Pocket Laser designed by Medency offers anti-inflammatory and pain-relieving effects equal to NSAIDs but with no side-effects. It has incomparable results in wound healing and repairing of soft tissues and bones, enhances the immune response, and encourages nerve tissue regeneration.

Developed with effort and passion...for Vet specialists.

 **DYNAMO**

Medency is constantly up-to-date on the last clinical findings and focused on developing breakthrough laser technology to increase the reliability of the studio and animal care standard.

THE PORTABLE LASER YOU WERE WAITING FOR!
