Diode Laser Technology for Aesthetic procedures

# EFFECTIVE AND SAFE TO BRING PATIENTS ON A NEW AGE!

Rapido Derma is a safe and effective laser device developed by Medency to provide a minimally invasive procedure to liquefy and remove unwanted fat in targeted body zones. In addition, its thermal effect causes the collagen to contract, resulting in firmer, smoother skin that further enhances the body shaping goals.

Rapido Derma finds reliable results also in endolifting, hyperhidrosis and microsurgery such as blepharoplasty.

The innovative approach using laser technology increases wound healing and reduces recovery time.

**RAPIDO**  
DERMA

Medency is constantly up-to-date on the latest clinical findings and focused on developing breakthrough laser technology to increase the reliability of the studio and patients' experience.

## YOUR PATIENTS DESERVE THE BEST!

- Effective surgery
- Micro-lipolysis procedures
- Minimal thermal effect
- High working efficiency
- Faster and less invasive treatments
- High level laser therapy
- Easy-to-use software
- Portable unit working with battery and wireless pedal
- Ergonomic and attractive design
- Flexible fiber, optical tips and versatile accessories
- Sleek and autoclavable probes

## WIDE RANGE OF ACCESSORIES

Acne

Blepharoplasty

Anti-aging

Lypolysis

Endolifting

Microsurgery
